

COMP 201 - Fall 2021

Lab 3: Strings

1 Lab Assignment

1.1 Download lab3-assignment.zip from Blackboard

1.2 Unzip it

1.3 Copy “lab3-assignment” folder to linuxpool.ku.edu.tr servers

```
scp -r lab3-assignment USERNAME@linuxpool.ku.edu.tr:/Users/USERNAME/
```

1.4 Implement Functions

You will only modify the `main.c` file in this assignment. There are several functions in this file. All functions have their descriptions as comments. They also have sample inputs and outputs for reference. You will implement these functions with given restrictions in mind. You can test your functions in the `main()`. For grading, we will only consider your function implementations. Please read function descriptions carefully, otherwise you might lose some points.

Note: Do not change names, inputs and return types of functions.

1.5 Copy “lab3-assignment” folder from linuxpool.ku.edu.tr servers to your local machine

```
scp -r USERNAME@linuxpool.ku.edu.tr:/Users/USERNAME/lab3-assignment
```

1.6 Submit your main.c file to Blackboard.

2 Academic Integrity

All work on assignments must be done individually unless stated otherwise. You are encouraged to discuss with your classmates about the given assignments, but these discussions should be carried out in an abstract way. That is, discussions related to a particular solution to a specific problem (either in actual code or in the pseudocode) will not be tolerated. In short, turning in someone else’s work, in whole or in part, as your own will be considered as a violation of academic integrity. Please note that the former condition also holds for the material found on the web as everything on the web has been written by someone else. See [Koc University - Student Code of Conduct](#).
